

## **Globanet Announces Merge1 Version 2.1 Release with Additional Functionality to Support Financial Firms Regulatory Compliance**

**Feeds Bloomberg, MindAlign, Skytel, Face Time IM, Blackberry SMS, Pin-to-Pin data, and others into Symantec Enterprise Vault, Exchange, and SMTP**

**Los Angeles, CA, and New York City, NY, March 4, 2009** – GLOBANET, an established leader in software and solutions for financial industry regulatory compliance, announced today the latest release of its text messaging archival software, Merge1 version 2.1. A snap-in module which works in conjunction with Symantec's Enterprise Vault, Merge1 archives unstructured data into Enterprise Vault from the following sources: Bloomberg, MindAlign, Skytel, Face Time IM, Blackberry SMS, Blackberry Pin-to-Pin, and others.

Merge1 is a general purpose extendable data importer that converts e-communication from a range of disparate formats into e-mail messages which can then be easily viewed and organized in an e-mail client. In version 2.1, Merge1 has the ability to parse text-delimited, .xml, and .eml files, converting records into e-mail messages before exporting them into a Microsoft Exchange environment. Another option is delivering e-mail messages to an SMTP address thus delivering to Lotus Domino and other systems. Merge1 supports advanced SMTP options, such as pipelining and authentication. This conversion process allows an organization to exercise further control over all e-communication through e-mail archival solutions. Version 2.1 also supports Symantec Enterprise Vault, including version 8.0, as an alternative target destination.

Other enhancements include improved reporting, Bloomberg file processing speed, SSRT Bloomberg file format support, and Bloomberg regionalization support.

Globanet provides a simple yet powerful solution in Merge1 v2.1. It is quick and easy to install and use yet provides unparalleled performance as it unites disparate data sources into one centralized, consolidated archive allowing for streamlined search and recovery processes.

"In order to meet demand, Globanet accelerated its production schedule to include support for more data types directly out-of-box instead of through custom development," noted CEO, Sevag Ajemian.

For more information about Merge1 please call 1-888-427-5505 option 2, mail to: [sales@globanet.com](mailto:sales@globanet.com), or visit Globanet's website: <http://www.globanet.com>.
