

## **Globanet's Merge1 v2.0 Delivers Increased Support for Unstructured Data Types for Financial Industry Regulatory Compliance**

### **Feeds Bloomberg, Blackberry SMS and Pin-to-Pin, Skytel, MindAlign, and FaceTime IM data into Symantec Enterprise Vault**

**Los Angeles, CA, and New York City, NY, September 23, 2008** – GLOBANET, an established leader in software and solutions for financial industry regulatory compliance, announced today the latest release of its text messaging archival software, Merge1 version 2.0. A snap-in module which works in conjunction with Symantec's Enterprise Vault, Merge1 archives unstructured data into Enterprise Vault from the following sources: Bloomberg, Blackberry SMS and Pin-to-Pin, Skytel, MindAlign, and FaceTime IM.

As the financial industry faces the daunting task of reducing legal risk while disparate data platforms and devices multiply, Globanet provides a simple yet powerful solution in Merge1 v2.0. It is quick and easy to install and use yet provides unparalleled performance as it unites disparate data sources into one centralized, consolidated archive allowing for streamlined search and recovery processes.

"In order to meet demand, Globanet accelerated its production schedule to include support for more data types directly out-of-box instead of through custom development," noted CEO, Sevag Ajemian, "This allows us to streamline implementation and lower the total cost of ownership for our clients."

Merge1 was originally developed over two years ago when a prominent Fortune 500 company partnered with Globanet to develop software to collect data from several sources and legacy networks and feed it into Symantec's Enterprise Vault. Since Globanet architects had already developed a similar tool to collect data from Bloomberg, it rapidly redeveloped it into a generic engine that could then be easily customized to support any data type.

For more information about Merge1 please contact Globanet at 888-427-5505 or [merge1info@globanet.com](mailto:merge1info@globanet.com) or visit Globanet's website: <http://www.globanet.com/merge1/>
